Part III DETAILED ACTION

Notice to Applicant(s)

This application has been examined. Claims 1-4, 11-13, 16 and 18 are pending.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4, 11, 13, 16 and 19 are rejected under 35 U.S.C. § **102**(**b**) as being anticipated by Holmdahl patent number 5,675,813.

As for claims 1, 11, 13, 16 and 19, Holmdahl teaches an information processing equipment that carries out a communication path establishment processing at the time when a power source is turned on (see figure 2, computer 4, bus 24, 22 and column 11 lines 38-50, wherein when the computer 4 is powered on, the computer 4 establish communication path 33 with the master data hub 22 and the bus powered hub 33, the information processing comprising:

a connector that is connected with a communication line based on the needs (see figures 2, 3A, connector 30, communication line 33);

Application/Control Number: 09/845,331

Art Unit: 2112

a transmission/reception mechanism that transmit/receives data through the communication line connected to the connector (see column 6 lines 24-33);

a connection status deciding unit that decides whether the communication line has been connector to the connector or not (see figure 3A, RT and column 6 lines 34-38, wherein the resistor RT permits the master data hub 22 to determine whether the bus power hub is present or not); and

a control unit that controls the transmission/reception mechanism to carry out an initialization processing for establishing a communication path connected to the communication line (see figure 3A, control switch 70, circuitry 60 and column 12 lines 43-49, wherein the circuitry 60 comprises RT indicating the master data hub 22 the presence or absence of peripheral devices. Further, control switch 70 permits initialization when a peripheral device is present);

wherein the control unit controls not to carry out the initialization processing when it has been confirmed that the communication line has not been connected to the connector as a result of the decision made by the connection status deciding unit (see column 12 lines 40-44, wherein the circuitry 60 determines if there is no peripheral device is coupled to it, the initialization procedure will not be carried out).

As for claim 4, Holmdahl teaches the connection status deciding unit comprises a detecting switch that mechanically detects a connection of the communication line to the connector, and a deciding circuit that decides a connection status of the communication line based on a result of the detection by the detecting switch (see figure 3A, switch 70 and column 7 line 45 to column 8 line 6).

Art Unit: 2112

Allowable Subject Matter

Claims 2-3 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tim T. Vo whose telephone number is 703-308-5862. The examiner can normally be reached on 7:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Rinehart can be reached on 703-305-4815. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
